

# THE GREENWORX GAZETTE

Your monthly update to educate, inform and inspire

Welcome to the June 2023 edition of 'The Greenworx Gazette'. This is our way to help educate, inform and share what's happening, not only within Greenworx maintenance and projects activity, but across the landscape industry.

## VIC GREENFLEET PLANTING DAY

Part of our VIC team also had the opportunity to attend the Annual Greenfleet Tree Planting day, hosted at Glendalough, South Gippsland in Victoria late last month. They had a fantastic day and were able to gain valuable insight about this reforestation project. Our team directly assisted by planting a range of trees and shrubs, such as:

- Eucalyptus globulus (Blue Gum)
- Eucalyptus strzelckii (Strzeleki Gum)
- Eucalyptus regnans (Mountain Ash)
- Cassinia sp.
- Kunzea sp.
- Olearia sp.
- Bedfordia arborescens (Blanket Leaf)
- Acacia melanoxylon (Blackwood)
- Acacia verticillata (Prickly Moses)
- Goodenia ovata (Hop Goodenia)

It was a great experience to be a part of and Greenworx look forward to attending the planting days again next year across NSW, VIC and QLD!

## **BRRRR-ILLIANT LANDSCAPE AND MAINTENANCE TASKS FOR THE WINTER SEASON!**

The winter season and reduced growth provides us with a greater opportunity to manage and improve the health and maintenance of gardens. Some of these tasks can include

- **Raking and collecting accumulated leaf litter:** Deciduous trees will continue to or completely lose their leaves in the cooler months of the year and this can negatively impact gardens and lawns. Build up can smother other ground covers and cause water to run off rather than be absorbed into the profile. It also doesn't look really good. :)
- **Mulching garden beds:** maintaining mulch levels around garden beds, trees and plants will assist with moisture retention and weed control. It can also help with maintaining optimal temperatures in the soil profile.
- **Pruning dormant shrubs and trees:** Pruning the plants during the cooler months can allow for preparation of new growth for spring.

- **Clean gutters:** Gutters can fill with leaves and debris during the winter months so it is important to remove this to ensure the water flow in the pipes and drain pits are not restricted. Blocked drains and pipes can impact water run off and can lead to flooding.

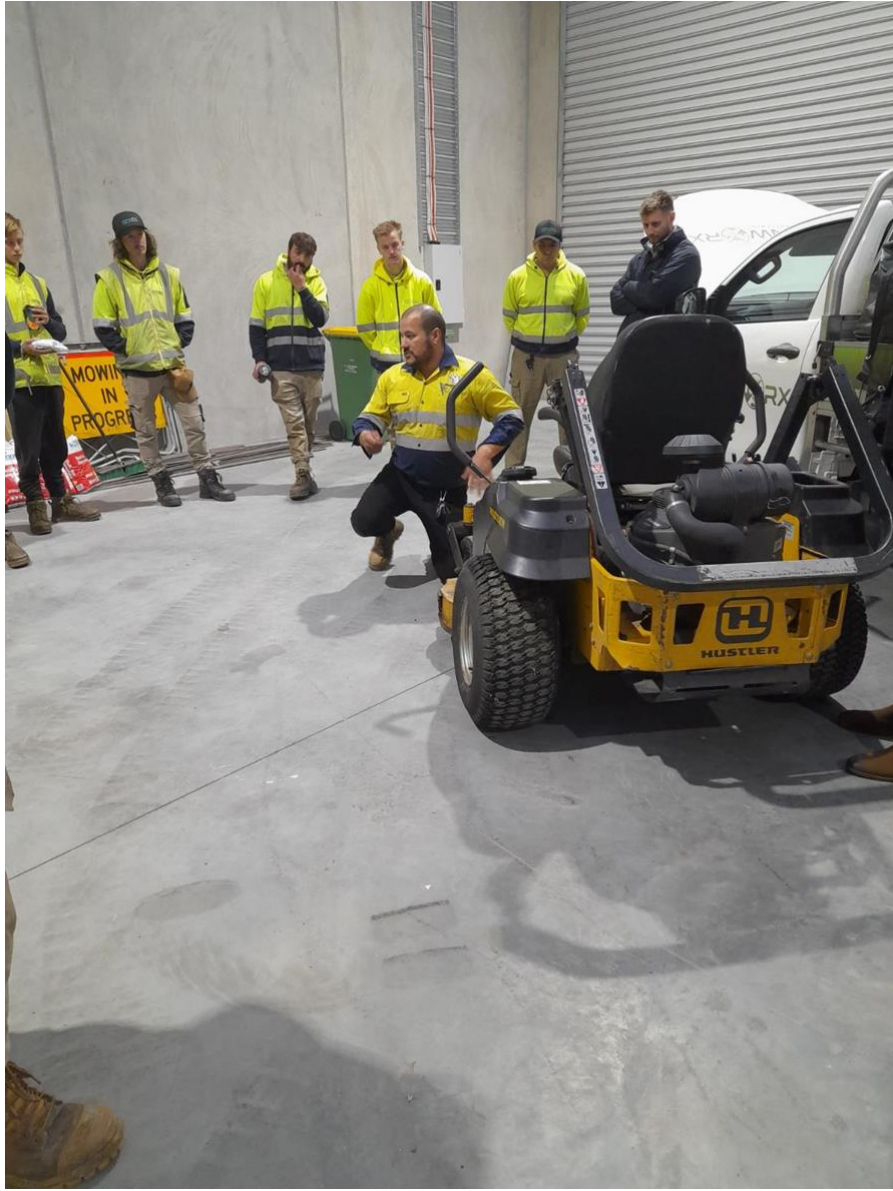

## TRAINING

It's that time of the year again where our teams are completing various training courses across the states to refresh their skills and understanding in multiple areas. This month our NSW team leaders completed their First Aid and CPR training recertifications.

## VIC SAFETY BREAKFAST

Our team in VIC recently attended a safety breakfast and during this meeting, the team were involved in targeted training with our small engine mechanic. They were able to increase their knowledge and skills in general maintenance checks and also have a greater awareness of what items are critical to inspect for safe operation of our equipment.

## EMPLOYMENT

**Do you enjoy working as part of a team?**

**Do you love working outdoors and at a variety of different sites?**

**Do you have or want to obtain a qualification?**

At Greenworx, we are seeking new team members to join our team. It is important to us to find people who share our company values and take pride in the tasks they complete everyday.

Consider giving us a call on **1300 476 979** or email

**[employment@greenworx.com.au](mailto:employment@greenworx.com.au)** to discuss the available positions in further detail.

“When experience and dedication matter,  
Greenworx makes all the difference.”
